

## 🚧 Construction Notice – Bridge Installation

The RM of Dufferin would like to advise residents that bridge installation work will begin on **February 23rd** at the previously closed bridge site located on **Road 22W North of PTH #3**.

This crossing has been closed for several years due to the bridge being out. We are pleased to share that construction is now moving forward to replace the structure.

The area will be an active construction zone beginning February 23rd, and the new bridge is anticipated to be open to traffic by **the end of May to mid June**, weather permitting.

We ask that residents continue to respect all barricades, signage, and construction personnel while work is underway.

We appreciate your patience and look forward to restoring access at this location.

— RM of Dufferin
